Passionate Software Engineer and U.S. Navy Veteran with a commitment to excellence and refined problem-solving abilities. My experience as a Naval Officer has instilled in me the values of teamwork, collaboration, leadership, and self-discipline, which have all proven invaluable in my career as a Software Engineer. I continuously seek new challenges to push myself to learn and grow.

TECHNICAL SKILLS

Front-End - JavaScript, Typescript, React, CSS, HTML

Back-End - Java, Gosu, Node.js, Express, PostgreSQL, Spring Boot

Testing - Mockito, JUnit

Tools - AWS, Git, npm, Postman, Splunk

Techniques - Agile Development, Pair Programming, Test Driven Development

EXPERIENCE

State Farm - Lead Software Engineer | Java, Gosu, OracleDB

September 2020 - Present

- Architected and developed robust RESTful APIs that efficiently manipulate and serve policy data to multiple teams and consumers, streamlining cross-functional workflows.
- Developed the team's main product, policy consolidation, which consolidates hundreds of thousands of customer auto policies, saving the organization millions of dollars in mail and enhancing customer experience.
- Implemented comprehensive test coverage across multiple products, resulting in an increase in team code coverage by over 40%, enhancing product quality and stability.
- Collaborated with internal teams and business partners, utilizing excellent communication skills to identify and recommend effective solutions for enhanced customer experience.
- Mentored and pair-programmed with junior engineers and interns, fostering growth and development of their technical and professional abilities.
- Authored and maintained detailed documentation for team's products and services, facilitating seamless knowledge transfer and effective onboarding of new team members.

Naval Aviator - U.S. Navy Officer and Pilot in Command of T-6B turboprop fixed wing aircraft

2017 - 2019

- Completed Aviation Preflight Indoctrination, a course consisting of advanced aerodynamics, navigation, meteorology and survival skills in sea, air and land
- Completed Primary flight training consisting of aerobatics, instruments, and formation flying

PROJECTS

T6 Briefer - Full Stack Software Engineer | React, Node.js, Express

Progressive web application built for naval flight students to assist in flight brief preparation

- Created the only aircraft performance data calculator for the Beechcraft T-6 Texan II accessible to students
- Increased usage to over 2000 monthly flight students within the first few months

EDUCATION

Hack Reactor - Advanced Software Engineering Immersive

2020

US Navy - Naval Flight School

2018

Florida Atlantic University - Bachelor of Arts in Criminal Justice

2015
